

# NeuroScan AI • Clinical Diagnostic Report

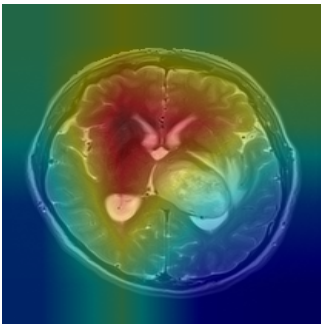

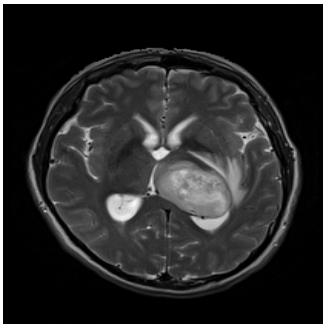

Automated Multi-Model Ensemble Brain Tumor Classification System

|                                    |                                  |
|------------------------------------|----------------------------------|
| <b>Patient ID:</b> UPENN-GBM-00385 | <b>Modality:</b> DICOM MR Scan   |
| <b>Age / Gender:</b> 057Y / M      | <b>Status:</b> Verified Analysis |

## Ensemble Model Predictions

| Model Architecture | Predicted Classification   | Confidence Score |
|--------------------|----------------------------|------------------|
| DenseNet121        | UNCERTAIN / LOW CONFIDENCE | 34.28%           |
| MobileNetV2        | UNCERTAIN / LOW CONFIDENCE | 29.42%           |
| VGG16              | UNCERTAIN / LOW CONFIDENCE | 19.9%            |

## Visual Analysis & Grad-CAM Heatmap

**Disclaimer:** This report is generated automatically by a computer vision research project prototype (NeuroScan AI). It serves as a preliminary diagnostic aid and must be reviewed by certified medical professionals prior to clinical decisions.
